

**Fact sheet short description**

The capabilities and the process methods followed by ValueSource India for the **ETL** process are highlighted in this fact Sheet

**About Us**

ValueSource India currently offers application development services to KBC group, one of the largest banking & insurance groups in Europe.

**ValueSource India ETL Team**

The ETL team at ValueSource India is quite a young and dynamic team and willing to learn and use the learning to provide datawarehousing solutions. Team consists of Oracle & PowerCenter certified professionals.

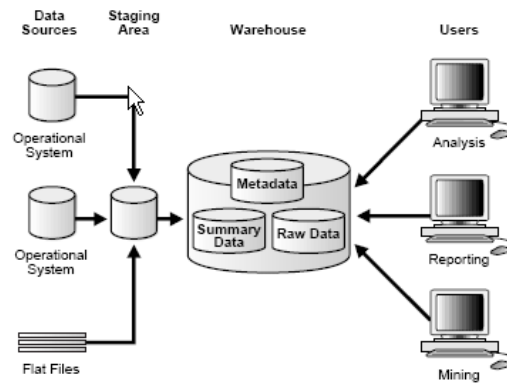

Our core strengths are in the areas of

1. New Projects
2. Change Management Activities
3. Monitoring Activities (Support)

We have a team strong in handling -

- Unix on Sun Solaris
- Oracle
- Perl
- Informatica PowerCenter
- Clearcase

The team has been successful in taking over the maintenance project from third party vendors, after an organized and systematic knowledge transition starting with Due diligence and has been subsequently carrying out the maintenance activities as per very strict standards of SLAs.

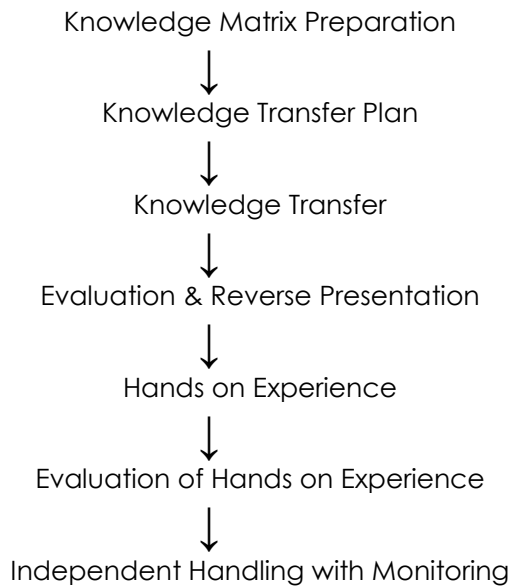

**Phases of Knowledge Transition**

**Planning**

ValueSource India starts with planning the various requirements right from Infrastructure, resources and Risk factors with a very well documented procedural flow.

**Knowledge Transition**

Knowledge transition is the key to success of any project especially in Maintenance. ValueSource India has been successful in taking over entire project after a challenging initial knowledge transition phase. The resources are thoroughly trained on the tools and techniques. They are capable of understanding the business complexities and acquire the domain knowledge on fast track. There is a rigorous evaluation procedure during knowledge transfer and the process steps are detailed in the following paragraph.

ValueSource India has built up a on technical and functional knowledge base after spending over 3200 man days in last year and a half and have gained over 6000 man days of ETL solutions providing experience. As a growing software company we are fully geared up to ramp up the resources quickly and provide additional capacity in a short time.

### Internal Quality

Internal quality is assured through a series of steps during development or maintenance.

The technical design is reviewed by the offshore team and test cases are prepared before the development is started. This ensures that there is no costly rewrite of code later.

Staged review of code is done through self reviews, peer reviews, code walkthroughs by groups and by systematic use of checklists before code is moved to acceptance.

### Testing

ValueSource India service on testing on ETL applications ranges from Unit level testing to integration testing and support during Acceptance Testing by Business.

### Configuration Management

Deliverable artifacts and components are well documented and tightly controlled to ensure the versioning is maintained in Clearcase.

### Tracking

ValueSource India has been consistently successful in meeting our customer's release dates as per their Release calendar, giving a very comfortable feeling to the customers and winning/retaining their confidence.

The reported issues from the customers are addressed and resolved within the defined and stringent SLA time lines that are generally agreed upfront.

### Key Learning

After every release, there is an evaluation and closure where key learning are analyzed, documented and highlighted to the stakeholders to prevent recurrence.

### Domain Skill Areas

- Insurance
- Banking

## Why ValueSource India

- ValueSource India is a subsidiary of KBC Bank, Belgium and the offshore development partner for KBC Bank.
- ValueSource India has the right experience and methodology of a software company to handle end to end software development, maintenance and Enhancement needs.
- ValueSource India is capable of applying its extensive experience obtained from earlier Application Outsourcing initiatives.

Rational Business Developer, Rational Clearcase, EGL and VisualAge Generator are trademarks or registered trademarks of IBM Corporation

## Lexicon

RAD	: Rational Application Developer
RBD	: Rational Business Developer
EGL	: Enterprise Generation Language
4GL	: Fourth Generation Language
ClearCase	: Open system based Version Controller
VAG	: VisualAge Generator
SDLC	: Software Development Life Cycle
Agile	: An iterative development methodology
Scrum	: An iterative development methodology

## Key Benefits

- Unicode Compliance
- Platform independence
- Portability between legacy and open systems
- One stop Service for requirement to implementation
